

DATA SCIENCE RESUME CHECKLIST & PROMPTS

MASTER PROMPT

Prompt:

Act as a professional technical resume writer and ATS specialist.

Objective:

Create a **one-page resume for a Data Scientist** that strictly follows the formatting, content, and layout rules below.

IMPORTANT RULES (FOLLOW ALL WITHOUT EXCEPTION)

- Font style: **Times New Roman** or **Arial** only
 - Resume must be **Overleaf / LaTeX-friendly**
 - Contact info order:
 - Mobile number (+91 mandatory)
 - Professional email
 - Address (City, State only)
 - LinkedIn and GitHub/Portfolio as clickable links
 - No tables or text boxes (ATS friendly)
 - One page only
 - All durations aligned to RIGHT MARGIN
 - Every bullet point starts with an **ACTION VERB**
 - No spelling or grammar errors
 - Resume saved as **PDF**
 - File name:
YourName_Data_Science_Resume.pdf
-

SECTION-WISE PROMPTS

1 Resume Summary Prompt (Data Scientist)

Prompt:

Act as a professional resume writer. Write a 2–3 line resume summary for an entry-level Data Scientist.

Profile details:

- Strong in Python, SQL, Pandas, NumPy, Scikit-learn
- Knowledge of statistics, machine learning, and data visualization
- Experience working with datasets, building predictive models, and dashboards
- Built projects for classification, regression, clustering, or recommendation systems
- Seeking Junior Data Scientist role

Tone: Professional, concise, human-written, no buzzwords, no first-person language

Format:

[Role/experience level] with experience in [tools/skills].

Known for [strength or achievement].

Seeking to [target role].

Example:

Entry-Level Data Scientist with experience in Python, SQL, Pandas, and Scikit-learn for predictive modeling, data cleaning, and visualization. Known for building data-driven solutions and actionable insights from real-world datasets. Seeking to contribute analytical and modeling skills in a Junior Data Scientist role.

2 Education Section Prompt

Prompt: Rewrite the education section for a Data Science resume.

Degree: Bachelor of Science in Computer Science

College: Dr. SNS Rajalakshmi College of Arts & Science

Graduation Year: 2025

Make it: Clean, ATS-friendly, professional, no unnecessary details

Example:

Bachelor of Science in Computer Science | 2025

Dr. SNS Rajalakshmi College of Arts & Science

3 Certification Section Prompt (Data Science)

Prompt: Rewrite certification in 3–4 concise bullet points:

Certification: Data Science / Machine Learning

Platform: (Entri Elevate in collaboration with Illinois Tech, US)

Completion Date: Month Year

Focus on:

- Python and SQL
- Data cleaning and preprocessing
- Machine learning models (regression, classification, clustering)
- Data visualization and dashboards
- Real-world datasets and case studies

Example:

Data Science Certification – Entri Elevate (in collaboration with Illinois Tech, US) | Month Year

- Performed data cleaning and preprocessing using Python and Pandas for real-world datasets.
- Built and evaluated machine learning models including regression, classification, and clustering.
- Created interactive dashboards and visualizations using Matplotlib, Seaborn, and Tableau.
- Analyzed case studies to generate actionable business insights.

4 Project Description Prompt (Data Science Projects)

Prompt: Rewrite Data Science project for resume.

Project: [Project Name]

Tools: Python, SQL, Pandas, NumPy, Scikit-learn, Tableau / Power BI

Focus on:

- Data cleaning and preprocessing
- Exploratory Data Analysis (EDA)
- Predictive modeling / ML
- Visualization and reporting
- Quantifiable impact

Example (Project 1):

Project: Customer Churn Prediction

Tools: Python, Pandas, Scikit-learn, Matplotlib

- Cleaned and preprocessed customer datasets, handling missing and inconsistent values.
- Conducted exploratory data analysis to identify trends and key factors influencing churn.
- Built logistic regression and random forest models, achieving 85% accuracy.
- Presented insights using Matplotlib visualizations, enabling targeted retention strategies.

Example (Project 2):

Project: Sales Forecasting Dashboard

Tools: Python, SQL, Tableau

- Extracted and transformed historical sales data from SQL databases.
- Developed predictive models using linear regression to forecast monthly sales.
- Created interactive Tableau dashboards for management to monitor KPIs.
- Reduced reporting time by 50% and improved forecast-based planning decisions.

5 Skills Section Prompt (Data Scientist)

Prompt: Optimize skills for ATS and entry-level Data Science roles.

Organize under:

Programming & Querying: Python, SQL

Machine Learning & AI: Scikit-learn, TensorFlow (optional), Regression, Classification, Clustering

Data Visualization: Matplotlib, Seaborn, Tableau, Power BI

Tools & Platforms: Jupyter Notebook, Git, GitHub, VS Code

Concepts: EDA, Data Cleaning, Feature Engineering, Data Modeling, Statistics

Example:

Skills

Programming & Querying: Python, SQL

Machine Learning & AI: Scikit-learn, Regression, Classification, Clustering

Data Visualization: Matplotlib, Seaborn, Tableau, Power BI

Tools & Platforms: Jupyter Notebook, Git, GitHub, VS Code

Concepts: EDA, Data Cleaning, Feature Engineering, Data Modeling, Statistics

6 Non-Technical Experience Prompt (Transferable Skills)

Prompt: Rewrite non-technical experience to highlight transferable skills.

Role: Sales Executive

Duration: June 2022 – 2023

Focus on:

- Data tracking and reporting
- Performance monitoring
- Problem-solving
- Communication
- Time management

Example:

Sales Executive | June 2022 – 2023

- Monitored and analyzed sales performance, generating reports to guide strategy and decisions.
- Identified trends, collaborated with teams, and resolved process inefficiencies.

RESUME FORMATTING & ATS REVIEW PROMPT

Prompt: Review my resume for ATS compatibility and recruiter readability.

Check for:

- Section order
- Keyword optimization (Python, SQL, Pandas, NumPy, Scikit-learn, Tableau, Power BI, Machine Learning, Data Cleaning, EDA, Feature Engineering, Regression, Classification, Clustering)
- Bullet clarity
- Quantification of impact
- One-page formatting

Provide improvement suggestions without rewriting.

FINAL RESUME REVIEW PROMPT (Recruiter Perspective)

Prompt: Act as a hiring manager recruiting a Junior Data Scientist.

Review my resume and:

- Identify weak sections
 - Suggest missing tools or keywords
 - Rate resume out of 10
 - Recommend final improvements before applying
 - Be honest and constructive
-

DATA SCIENCE RESUME CHECKLIST

1. Header & Contact Info

- ☐ Name bold and slightly larger
- ☐ Title: Data Scientist
- ☐ +91 phone number
- ☐ Professional email
- ☐ City, State only
- ☐ Clickable LinkedIn
- ☐ Clickable GitHub / Portfolio

2. Summary

- ☐ 2–3 lines max
- ☐ Tools mentioned (Python, SQL, Pandas, Scikit-learn, Tableau)
- ☐ No generic objectives
- ☐ Focus on skills + impact

3. Education

- ☐ Degree clear
- ☐ College name correct
- ☐ Graduation year included

4. Certifications

- ☐ Relevant to Data Science / Machine Learning
- ☐ 3–4 bullets only
- ☐ Tools mentioned
- ☐ Practical outcomes described

5. Projects (Most Important Section)

- ☐ Real datasets used
- ☐ Data cleaning + EDA performed
- ☐ Machine learning models applied
- ☐ Dashboard / visualization included
- ☐ Quantified results
- ☐ 3–4 bullets per project
- ☐ Action verbs used

Strong Action Verbs: Analyzed, Cleaned, Built, Modeled, Predicted, Visualized, Optimized, Designed, Automated

6. Skills Section

- ☐ Properly grouped
- ☐ Matches job description
- ☐ ML, data handling, and visualization included
- ☐ Soft skills minimal

7. Experience (If Any)

- ☐ Shows analytical thinking
- ☐ Measurable impact
- ☐ Highlights reporting, tracking, or automation

8. Formatting & ATS Readiness

- ☐ One page
- ☐ No tables
- ☐ Clean spacing
- ☐ Consistent font size
- ☐ No grammar mistakes
- ☐ LaTeX-friendly structure
- ☐ PDF format

9. Final Quality Check

- ☐ All links working
- ☐ No typos
- ☐ Keywords optimized (Python, SQL, Pandas, NumPy, Scikit-learn, Tableau, Power BI, Machine Learning, EDA, Regression, Classification, Clustering)
- ☐ Correct file name:

YourName_Data_Science_Resume.pdf
